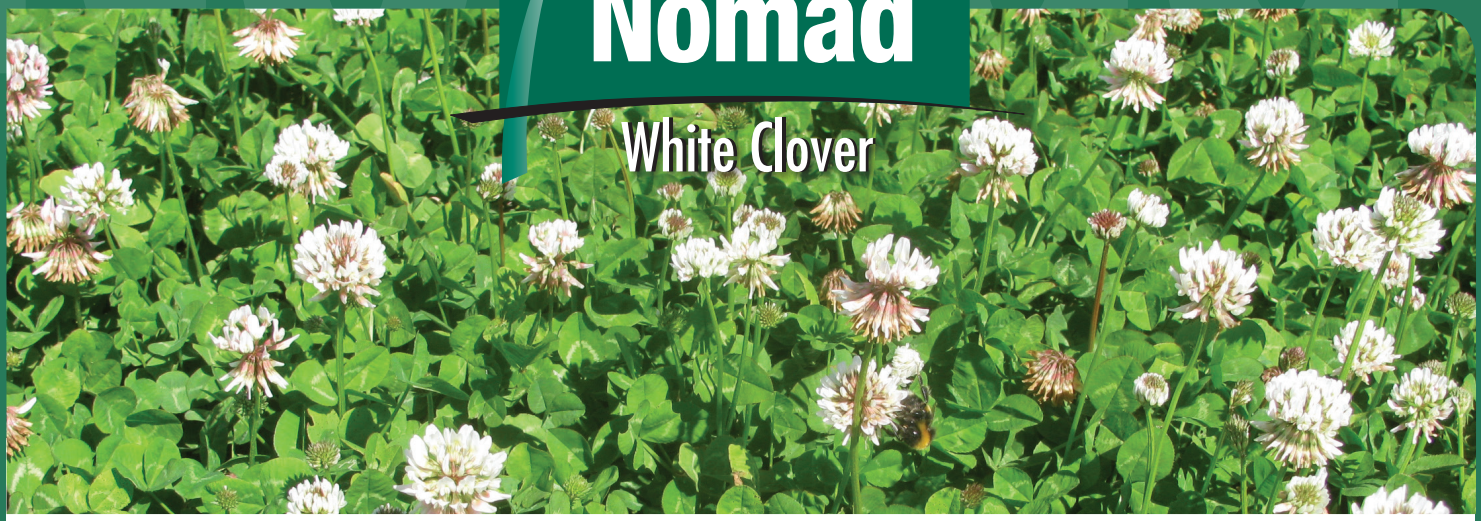
Grasslands®

Nomad

White Clover



Background

Nomad is a small to medium leaved white clover particularly suited to Australian conditions and is recommended as a base component for white clover blends. **Nomad** was selected for increased persistence, especially in dry environments. Its greater stolon density enables **Nomad** to persist in areas prone to low summer soil moisture levels.

Key Features

- ✓ Replacement for Prestige white clover
- ✓ Small to medium leaved white clover
- ✓ Strong performance under dryland sheep grazing
- ✓ Good drought tolerance
- ✓ Great persistent white clover
- ✓ Should be included in all dryland mixes

Nomad grows mostly in spring, summer and autumn. Suited to a wide range of soils, **Nomad** can be relatively tolerant of acidic soils. Nomad has high nutritive value and being a persistent type white clover it can tolerate some heavy grazing.

Perenniality	Stolon Density	Leaf size	Suggested Sowing Rate (kg/ha)
Perennial	High	Small to Medium	3-5 alone, 1-3 mix
