

# Tall Fescue

## SF Medallion

mediterranean tall fescue

FEATURES	BENEFITS
High winter production	Produces feed when it is most needed
Excellent feed quality	This provides higher liveweight gain and milk per ha
High summer dormancy	Provides the plant with outstanding persistence, especially in areas of hot dry summers
Nil endophyte status	Poses no animal health risks to all livestock classes

### Sowing rate

sole grass with clovers	8–12kg/ha
mixes with lucerne	4–6kg/ha

mid season maturity

Australian release  
> 2011

### The medal winning winter active fescue

SF Medallion is a new summer dormant mediterranean tall fescue. It has been selected to produce similar yields to existing types, but with lower NDF and higher ME for increased animal intake and liveweight gain.

It has shown excellent palatability and persistence in Australian trials. It has no endophyte and poses no animal health risks to grazing livestock, including horses and alpacas.

SF Medallion is two weeks later flowering than current mediterranean varieties.

Stock suitability  
> All livestock types  
> Silage & hay

### Forage EBV's – compared to industry standards\*
